At Power Source Engine Parts, we are at the heart of cooling system of engines for agricultural vehicle, commercial vehicle and off highway equipments.

Across our product range, we draw upon our innovative thinking, unrivalled depth of knowledge and quality manufacturing to ensure ultimate performance of our products, however demanding the application.

Our guiding principle to evolve continuously is at the forefront in creating excellence across spectrum of activities ranging from design to proto typing and onwards to the final supply stage.

We pride ourselves in closely monitoring changes in customer and market needs and proactively engage ourselves to fulfill these requirements.

Our Vision

Through constant innovation, we have embarked on a journey to become an reliable and trusted supplier of highest quality Water Pumps at the most competitive prices to our customers

Mission Statement

Comprehensive product portfolio:

To continuously strive to adopt and implement state of the art technology - be it in process, products or people, with the objective to create technologically advanced comprehensive product range

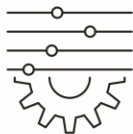

Customer orientation:

To build and supply distinctive product quality, adhere to delivery commitments and provide cost effective solutions to meet and exceed customer expectations

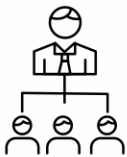

Continuous improvement:

To engage in quality manufacturing process and adopting latest quality tools to continuously improve & move up the process value chain

State of the art technology:

To maximize benefits arising out of technology by installing programmable logically controlled machines and equipments & comprehensive use of information technology in all sphere of activities

Personnel development:

Constant endeavor to uplift employee's skills and knowledge, providing them comfortable working environment and meeting their expectations to work better for the company's future

Core Values

Integrity

Operating with transparency and honesty

Excellence

Aiming for highest quality standards in all products that we manufacture

Evolve

Promote and implement creative & innovative ideas and solutions

Partnership

Build everlasting relations with the customers, suppliers and our human resources

Accountability

Act as an organization reliable in terms of commitment and action

POWER SOURCE Water Pumps A Great Choice

Power Source Water Pumps offer an excellent coolant flow rate achieved through optimum design, use of high quality components, superior process controls, rust protection and unfailing sealing parameters.

Each component has its own technical specifications and standards. The product is tested and validated both at the component as well as aggregate level. All Water Pumps are subjected to rigorous pressure leak test to replicate the actual operating conditions of the pumps. This guarantees an easy installation and flawless performance of the pumps whether operating in stationary, normal or high speed stressful engine conditions

Product Application & Range

Power Source offers a wide range of water pumps to suit diverse application. Our pumps seamlessly fit and perform efficiently on tractors, light and heavy duty commercial vehicles and off highway plant & equipments

To fulfill our customer requirement our focus is to constantly enhance the product range with calibrated approach at all levels. All our products come with a warranty feature for the lifecycle and cooling performance of the pumps

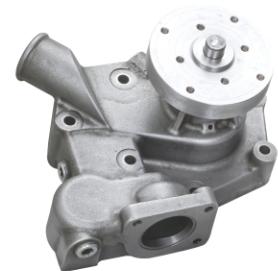

Market Presence

Product Diversity

EVOLVE AND EXCEL

Design & Reverse Engineering

Major contribution to our success has come from our ability to re-engineer and enhance product range absorbing the latest technology platform and tools.

We have actively pursued designing, prototype development, testing and new product validation

Manufacturing Quality:

The manufacturing activity is equipped with state of the art plant & machinery, skilled manpower and all variable resources required to produce distinct quality Water Pumps

Quality at Power Source is an ever evolving phenomenon.

Quality of process and quality of conformance are the fundamental principles driving our manufacturing journey.

Currently ISO 9001: 2015 certified, we are swiftly moving forward to adapt various Lean Manufacturing Modules and Automation to seamlessly integrate in the production chain.
